# Chapter 3 Interface

## 3.1 Interface

Specifications:

Data Transmission Method : Asynchronous Serial.

Handshaking : DTR/DSR Control

Default Protocol : 9600/19200 bps, non-parity, 8 data bits, 1 stop bit.

Communication Protocol

### 1. Receive Data.

The DTR signal is as follows:

[HIGH] This indicates that the display isn't ready to receive data.

It depend on the following conditions:

- % The period from when the power is turned on to when the printer first becomes ready to receive data.
- % When the remaining space in the receiving buffer becomes 128 bytes or less.
- % When the DTR signal of the printer is HIGH when the printer is selected using the command.

[LOW] This indicates that the display is ready to receive data.

It depends on the following conditions:

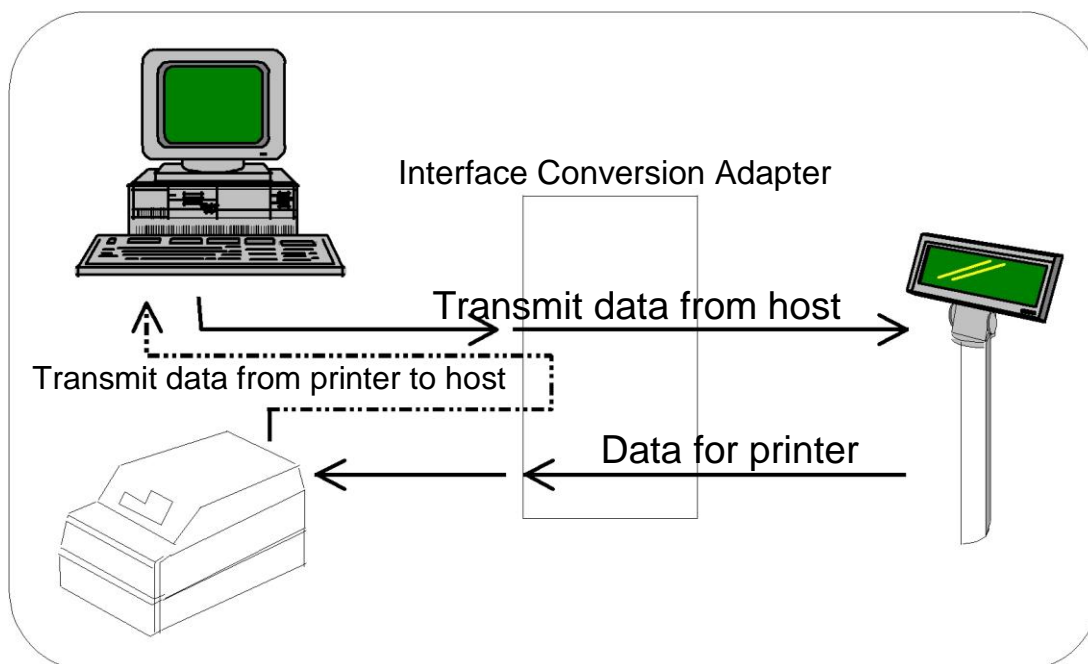

- % When the printer first becomes ready to receive data after power-on.
- % When the remaining space in the receiving buffer becomes 128 bytes or more.
- % When the DTR signal of the printer is LOW when the printer is selected using the command.

### 2. Transmit Data.

After confirming the DSR is LOW, data is transmitted to printer.

## 3.2 Interface Conversion Adapter

The interface adapter section has connectors for the display panel, the printer, the power supply, and host computer. All the data transmitted from the host computer will be received by the display. If this data is for the display, the data will be processed, and if it is for the printer, it will be transmitted to the printer. Whether the data is for the display or the printer can be switched using the peripheral device selection command.

### ( II ) Connector for Host Computer

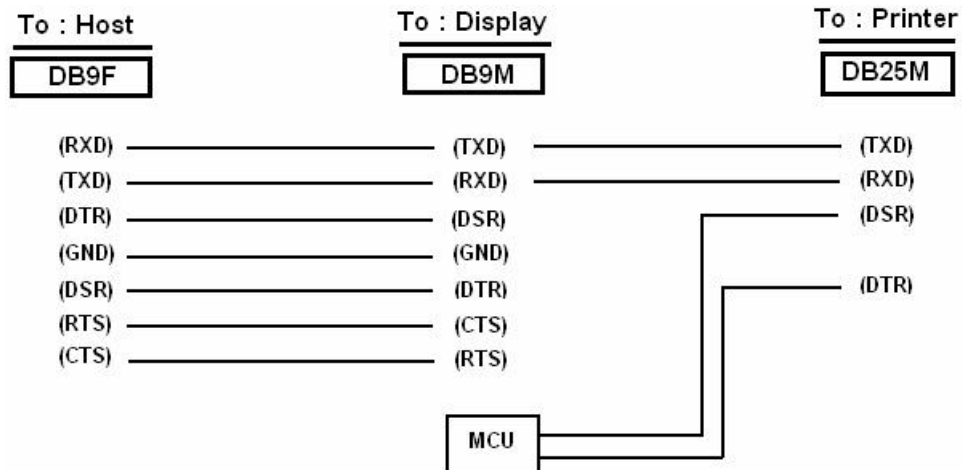

PIN Assignment

Pin No.	Signal	I/O	Description
1	NC		No Connection
2	TXD-	OUTPUT	Transmit Data
3	RXD	INPUT	Receive Data
4	DSR	INPUT	Data Set Ready
5	GND		Power GND
6	DTR	OUTPUT	Data Terminal Ready
7	CTS		Clear To Send
8	RTS		Request to Send
9	By Selection		N.C. or +5V ~ +12V

### ( III) Passthru Mode

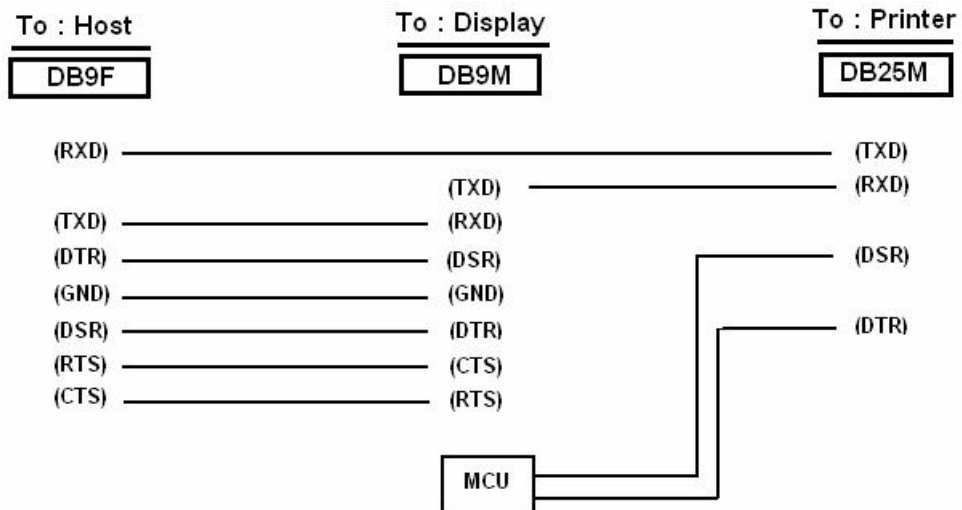

#### PASS 1

For the printer with ESC/POS command

#### PASS 2

For the printer without ESC/POS command
